You may see and feel the amazing results of our luxurious moisturising creams, serums, treatments, and whole skincare collection in only a few minutes. The world's most perceptive women choose this brand because of its dedication to offering top-notch skincare treatments. We cordially invite you to experience the inner and outer beauty we guarantee.

# DERMAQUEST

## THE FUTURE OF SKINCARE HAS ARRIVED!

DermaQuest's collection offers luxurious skin care that is moisturising and protective, rich in botanical stem cells, peptides, and vitamins, and that promotes skin integrity. Our products and sequences do a lot more for your skin than just prime and pamper it. We were the first to formulate with substances that later became popular in the market. The same remains true today. Nobody else utilises them in the same manner or with the same results as we do. With a very effective prescription strategy to address any skin condition, the outcomes are uncompromising.

# Pico Q-switch Nd Yag Laser

The Picotech Laser uses ultra-short pulses (one trillionth of a second in length) to hit the melanin with a great pressure, the melanin shatters into tiny dust-like particles. Because the particles are so small, they are more readily absorbed and eliminated by the body. It is a quick and easy non-surgical, non-invasive laser skin treatment for the body.

## Advantages

- South Korea imported 7 joint articulated arm.
- Variety of Wavelengths and handpieces.
- Aiming beam (635nm) For targeted and precise treatment.
- High peak power.
- High quality laser source.
- Short pulse width (600ps).
- 2-10mm adjustable spot size.

## Application

- Professional and effective freckle tattoo removal.
- Pigment Removal: Superficial pigment stains, such as freckles, senile plaque etc.
- Nevus Removal: Such as nevus of Ota, blue nevus etc.
- Mild and stubborn melasma removal
- Skin Rejuvenation: Shrinkage of coarse pores, small telangiectasia removal, skin whitening etc.
- Smooth wrinkles: Such as fine line, eye line etc.

## Specifications

Output mode - Pico Laser Q-switch Pulsed output

Wavelength - 1064nm, 532nm , 755nm

Pulse Duration - 6ns

Frequency - 1-10Hz adjustable

Single Pulse energy - 100mj-2000mj

Safety distance - NOHD 1km. Operator must wear goggles

Cooling system - Water cooling + Air heat exchange

Work mode - Continually work with intervals

Spot Size - 2-10mm

Output energy - 1064nm: 100-2000mj; 755nm: 100-2000mj;

# ExQ-Laser™ Q-switch Nd Yag Laser System

ExQ-Laser™ is newly released Q-Switched Nd:YAG laser therapy system. The system has an optimal clinical treatment effect with following parameter designs: dual-wavelength switching of 1064nm & 532nm, pulse width short to 5ns and Energy output up to 1000mj.

ExQ-Laser™ is safety and reliable with excellent performance, has successively achieved Certificates from CFDA and FDA. Its unique designs also earn multiple global patents.

## Why Q-switch?

**Safest  
Method**

**Painless  
Treatment**

**Low  
Scarring**

**Minimal  
Recovery**

## Function

- Melasma.
- Hyperpigmentation.
- lentiginos.
- Speckle.
- Tattoo Removal.
- Port wine birthmarks.
- Elangiectasias.
- Spider angioma.
- Cherry angioma.
- Spider nevi.
- Carbon peeling treatment.
- Skin rejuvenation.
- Balance uneven skin tones.
- Shrink pore.

## Advantages

- Flat-top hat Beam.
- Real-time energy monitor & Auto-Calibration System.
- Energy density is automatically adjusted with spot size.
- Short pulse duration 5ns.
- Adjustable spot size 10-2mm.
- Stable power supply with High peak power.
- Water Filtration System.
- 10.4inch touch display & 7 Joint articulated arm.

## Specifications

Laser Type - Q-Switched Nd:YAG

### Why us?

- 70w high power
- USA RF tube laser driver
- Korealab 7 joint laser arm
- USA imported nano sensor motor
- Fully intelligent operating system
- Unique sliding scan treatment mode

### Functions

- Reduction of fine lines and wrinkles
- Improved skin texture
- Tightening of facial and neck skin
- Reduction of pore size
- Reduction of unwanted pigmentation
- Reduction of precancerous sun spots (actinic keratosis)
- Improvement in appearance of scars (e.g. acne scarring and stretch marks)

### Mono/Bipolar Modes

#### Negative Handle:

Together with MONO polar, energy transfer deeper.

#### FACE: EVENLY, UNDER BIPOLAR

50% needle is positive & the other 50% is negative polar. This make the energy only works on depth of the needle. This mode is more suitable for face treatment.

#### BODY: DEEPER, UNDER MONO

All the needles on the tip is positive polar. The customer needs to hold the negative polar in hand during treatment. The RF energy can go to more deeper to skin than Bipolar mode. So it's more suitable for body treatment.

# New Silicone Cryolipolysis + Cavitation + RF + Lipo Laser Machine

✓ **Weight Loss**

✓ **Fat Removal**

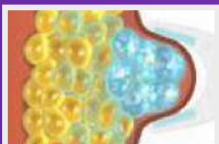

## Functions

- Body slimming, Reshape body line
- Cellulite removal
- Localized fat removal
- Lymph drained
- Skin tightening
- Pain relief for relaxation
- Improve blood circulation
- Combine cryolipolysis, cavitation treatment with RF to enhance slimming effect of beauty equipment

## Advantages

- Non-surgical technology
- Cryolipolysis technology advanced than Lipo surgical technology
- Popular technology in Europe and American
- Newest technical to lose weight reduce 26% fat in treatment area
- New technical is more advanced than RF and ultrasonic.
- Eliminate body fat part by part where you want to reduce

## How Cryolipolysis works

- Some stubborn fat bulges are immune to diet and exercise
- Freeze fat equipment targets and cools fat cells to temperatures that trigger fat cell apoptosis.
- No damage to nerves or other tissues because lipids in fat crystallize at a warmer temperature than water in other cell types.
- Following treatment, fat cells enter an apoptotic death sequence and are gradually removed in the next few weeks and months by the immune system.
- Fat layer thickness significantly reduced.

## Specifications

# 7D HIFU ULTRAFORMER III

## Phoenix 7D-Suspended Anti-aging System Imported third-Generation Ultrasonic Lipolytic Knife

Ultraformer III's Micro Focused Ultrasound system has a smaller focus point than other HIFU devices. With more accurately transmits high-energy focused ultrasound energy at 65-75°C to the target skin tissue layer, Ultraformer III results in a thermal coagulation effect without harming surrounding tissues. While stimulating the proliferation of collagen and elastic fibers, it greatly improves the comfort and gives you a perfect V line face with the skin plump, firm, and elastic.
